

<b>Charles Heath Reserve Community And Play Space</b>			
<b>Contribution ID</b>	<b>Date Submitted</b>	<b>Your feedback:</b>	<b>Council Response</b>
15117	Jul 26, 2021, 09:42 AM	<p>I note that no access to Coonardoo Close is proposed as part of the Charles Heath Reserve upgrade, despite this obvious opportunity being previously raised by a number of respondents. This denies the people of Canada Bay (suburb) a safer and more direct access to the Reserve than Queens Rd. The project should be paused while a plan is developed and community consultation commenced with directly affected residents.</p>	<p>Formalising the path from Coonardoo Close through to Charles Heath Reserve will be addressed when a review and masterplan for the golf course in undertken in the near future.</p>
15108	Jul 25, 2021, 10:52 PM	<p>Please ensure that the play area for children has a secure gate. Given the main road isn't very far away. It would be safest with a gate around the playground.</p> <p>Shade over the play areas where young children would be playing for long periods under the sun would be protective against sun damage. Even if the shade were those fabric triangles (like at Burwood Park playground or Livvis place Five Dock).</p> <p>Soft ground over bark chips/dirt soil for the ground of the play area please.</p> <p>Perhaps a herb garden with</p>	<p>Fencing and a gate will be incorporated in the playground.</p> <p>Shade is included over some of the play areas, and there will be additional trees planted.</p> <p>There is provision made for a community garden to be installed at a later date.</p> <p>There will be elements of Art incorporated in the new facility.</p>

		<p>low maintainable herbs that could be used with BBQ such as rosemary, thyme, oregano. (Perhaps could start a community program/group for local children to care for and grow them).</p> <p>Art feature: please look into Christina Huynh! Anything she creates would be so beautiful with the new playground. To perhaps highlight the new beautiful landscaped area but also maintaining a balance of nature and the surrounds.</p>	
14586	Jul 15, 2021, 07:32 PM	<p>Please extend the footpath/access to the park to Regatta rd to allow safe access without on bike without having to travel along the busy Queens rd. This is of great importance to the community who will frequently use this park with their young family</p>	<p>Formalising the path from Coonardoo Close through to Charles Heath Reserve will be addressed when a review and masterplan for the golf course in undertaken in the near future.</p>
14028	Jul 08, 2021, 10:16 PM	<p>Please include connection to future pedestrian path connecting Coonardoo Cl as this was the main request from locals in Canada Bay and member of Leisure Centre. This is important to connect access for cyclists to avoid using the dangerous and very busy Queens Rd to access the new park. Regards, Kevin</p>	<p>Formalising the path from Coonardoo Close through to Charles Heath Reserve will be addressed when a review and masterplan for the golf course in undertaken in the near future.</p>

13997	Jul 08, 2021, 09:48 AM	<p>Hi James</p> <p>I live in a townhouse which backs directly on to Charles Heath Reserve and i would like to ask about a couple of things which concerns me and my wife.</p> <p>What are you doing about extra parking ? At the moment the parking is full during the week and partially full on weekends, with the masterplan i do not see any extra parking spaces , why is this ? And I cannot see any garbage bins on the plan is there going to be any , with all the extra people it will bring there will be rubbish to get rid of.</p> <p>Regards Paul</p>	<p>Existing parking will be upgraded as part of the works. The Health club will relocate to the nesw facility at Concord Oval in mid 2022, which will reduce the demand on existing car parking spaces. Yes Garbage bins will be provided.</p>
13982	Jul 07, 2021, 05:57 PM	<p>Hello,I'm very impressed with the latest masterplan for the upgrade, the design has developed a long way since the last iteration. My only comment is Key item 20; car park entry. I don't believe this is necessary, It can not be easily monitored by patents and has a relatively short safe zone before it becomes a dangerous car park. In a scenario where a child looses something over the fence to the car park, I'd be concerned of a child using this gate on their own to run into the car park.I don't think it would be unreasonable to expect those who wish visit the park to walk around the front of the building, instead of this shortcut.2</p>	<p>The carpark entry in this location, provides access from the Northern Carpark. This car park will be more utilised than it currently is when the playground becomes operational. We will explore the use of child safe locks in this location.</p>

		<p>exits would be plenty. I believe parents would feel a lot more comfortable knowing there are only 2 ways in and out of the park - 3 is too many to worry about. I'm looking forward to seeing this project realised, you're all doing a fantastic job! Kind regards, Dean Scott</p>	
13829	Jul 05, 2021, 07:59 PM	<p>Please ensure sand water area isn't as poorly designed / constantly damp / slip hazard as it is at Livvis playground timbrell park. Thank you.</p>	<p>We will incorporate this feedback as the design develops</p>
13707	Jul 05, 2021, 11:34 AM	<p>Hi,</p> <p>Just wondering if there will be access to the park from Coonardoo Close Canada Bay. I live on Bayview Road Canada Bay and accessing the park from Coonardoo close is safer than walking down Queen Street.</p> <p>Thank you Houda</p>	<p>Formalising the path from Coonardoo Close through to Charles Heath Reserve will be addressed when a review and masterplan for the golf course is undertaken in the near future.</p>
13705	Jul 05, 2021, 11:22 AM	<p>This play space will be such an asset to the community. Thank you! We can't wait to use the space.</p>
