

FIVE DOCK PERMIT PARKING SCHEME FACT SHEET

Improving parking in town centres is a priority. This includes making it more accessible, convenient and better able to support the local economy.

WHAT'S HAPPENING NEAR YOU

Following the commencement of construction in the heart of Five Dock for the future Metro West station and recent feedback on Council's community-led plan (Our Future 2036), Council consulted the community about a proposed Permit Parking Scheme (PPS) in Five Dock. This was generally supported by the community and was adopted by Council in October 2022.

Council will be implementing the Permit Parking Scheme around the Five Dock Town Centre:

- Timed Parking Restrictions will be installed with "Permit Holders Excepted" exemptions in the streets around Great North Road, Five Dock.
- Eligible Residents and Businesses can apply for permits, which will exempt them from these time restrictions.
- Permits only apply where the signs specify "Permit Holders Excepted Area 6". To assist in ensuring parking is available for customers and visitors, this does not apply to some of the existing time restricted areas, such as along Great North Road.
- Other restrictions such as 'No Parking' and 'No Stopping' will be installed as appropriate.

PERMIT ELIGIBILITY

- To be considered for a permit, generally people must live or work at a property within the area covered by the scheme. Other eligibility criteria applies.
- Permits are issued according to Council's Parking Policy.
- Each eligible residential property can apply for up to 3 Resident Parking Permits, minus the number of off-street parking spaces at the property.
- Each eligible business property can apply for up to 2 Business Parking Permits, minus the number of off-street parking spaces at the property.
- Each eligible residential property can apply for 1 Visitors Parking Permit, regardless of the number of off-street parking spaces.

- Please see the attached diagram for how off-street parking spaces are assessed.
- Some properties are not eligible for permits due to conditions placed on their Development Consent e.g. large multi-unit residential developments constructed in recent years.
- In some cases, properties may be used for multiple residences or businesses but are not subdivided. In such a case, Council will consider them as one property only when determining permit eligibility.

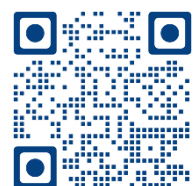

PROJECT TIMELINE

✓	December 2021	Community engagement on Permit Parking Scheme Proposal.
✓	December 2021 - June 2022	Review of feedback from Community to inform detailed design of Scheme.
✓	July 2022	Community consultation on detailed Scheme proposal.
✓	August 2022	Review of feedback from Community on detailed Scheme proposal.
✓	September 2022	Traffic Committee Approval.
✓	October 2022	Council Approval for Initial Scheme.
✓	November 2022 - May 2023	Review and expansion of Scheme based on feedback from key stakeholders.
⚠	June 2023	Community consultation and notification of Scheme.
⚠	01 July 2023 05 July 2023 29 July 2023	Applications open for Area 6. Community Drop-In Session. Traffic Committee Approval.
⚠	August 2023	Council Approval.
⚠	September 2023	Implementation of Scheme.

To Apply for Permits, please refer to the 'Parking Permits' Section: <https://bit.ly/CCBformsfacts>

Example No. 1

The diagram below shows a residence with 3 off-street parking spaces that can accommodate 3 cars.

In accordance with Council's Permit Parking Policy if 3 cars are registered to this property the resident is entitled to 1 Resident Parking Permit.

How is this calculated:

A maximum of 3 resident parking permits may be issued per residence reduced by 1 for every off-street parking space available at the residence. In this case, however, whilst 3 off-street parking spaces are available, Council's allowance for stacked driveway parking only counts 2 of these spaces. The maximum of 3 permits is therefore reduced by 2 off-street parking spaces.

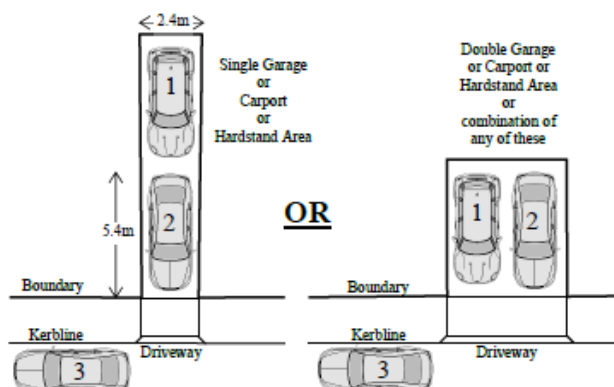

Note: The resident is also be entitled to 1 Visitors Parking Permit.

Example No. 2

The diagrams below show residences with 2 off-street parking spaces that can accommodate 2 cars.

In accordance with Council's Permit Parking Policy if 3 cars are registered to either of these properties then the resident is entitled to 1 Resident Parking Permit.

If less than 3 cars are registered to these properties the resident would not be entitled to any Resident Parking Permits.

How is this calculated:

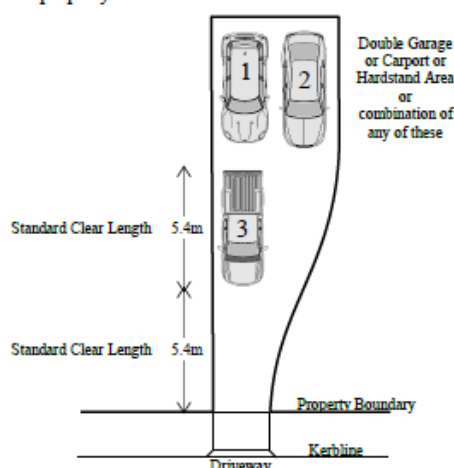

A maximum of 3 resident parking permits may be issued per residence reduced by 1 for every off-street parking space available at the residence. In this case 2 off-street parking spaces are available. Therefore if 3 cars are registered to this residence the maximum of 3 permits is reduced by 2 off-street parking spaces.

Note: The resident is also be entitled to 1 Visitors Parking Permit.

Example No. 3

The diagram below shows a residence with 3 off-street parking spaces that can accommodate 3 cars.

In accordance with Council's Permit Parking Policy the resident is not entitled to any Resident Parking Permits irrespective of the number of cars registered to this property.

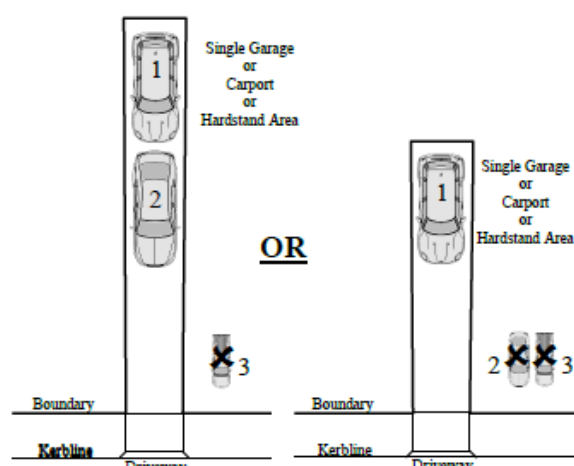

How is this calculated:

A maximum of 3 resident parking permits may be issued per residence reduced by 1 for every off-street parking space available at the residence. In this case 3 off-street parking spaces are available (including 1 stacked parking space) and therefore no permits may be issued.

Note: The resident is still be entitled to 1 Visitors Parking Permit.

Example No. 4

In accordance with Council's Permit Parking Policy if the number of cars registered to a residence is equal to or less than the number of available off-street parking spaces then the resident is not entitled to a Resident Parking Permit.

How is this calculated:

A maximum of three resident parking permits may be issued per residence reduced by one for every off-street parking space available at the residence. In these above cases the number of off-street parking spaces is equal to or greater than the number of cars registered to this address. Therefore no permits can be issued.

Note: The resident is still be entitled to one (1) Visitors Parking Permit.
