

Origami Corner Bookmark

Starting with a rectangular piece of paper, fold one corner up to meet the opposite side; then cut away the excess, creating a square of paper.

1. Lay the square of paper in a diamond position.

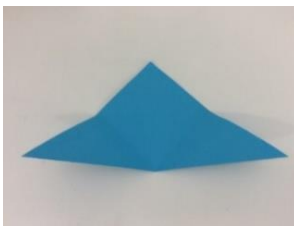

2. Fold the diamond in half, taking the bottom corner to the top to form a triangle.

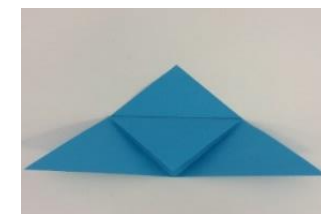

3. With the triangle pointing up, take the bottom left point up to meet the centre point at the top and crease firmly.

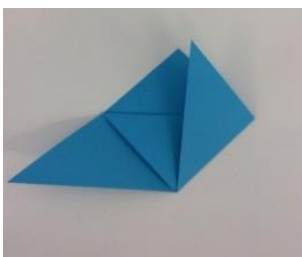

4. Repeat with the right corner. The paper should now be a smaller, folded diamond.

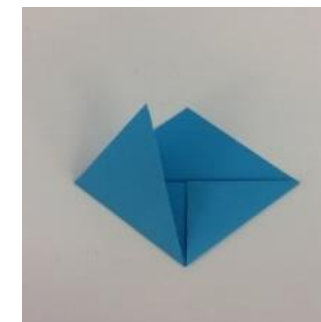

5. Unfold the previous two folds.

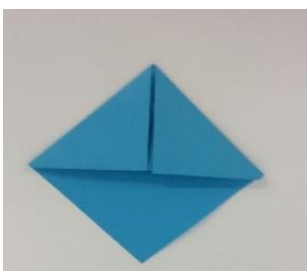

6. At the top point of the triangle, fold the top layer down to meet the long bottom edge.

7. Fold the outer right triangle point back up to meet the top triangle point. Then fold the point under, tucking it into to begin to form a pocket.

8. Do the same with the outer left triangle point: fold it up to meet the top triangle point and then fold the point under and tuck it into the pocket.

9. Decorate the completed bookmark with paper scraps, stickers.
