

# Origami Bird Craft

Start with a square piece of paper.

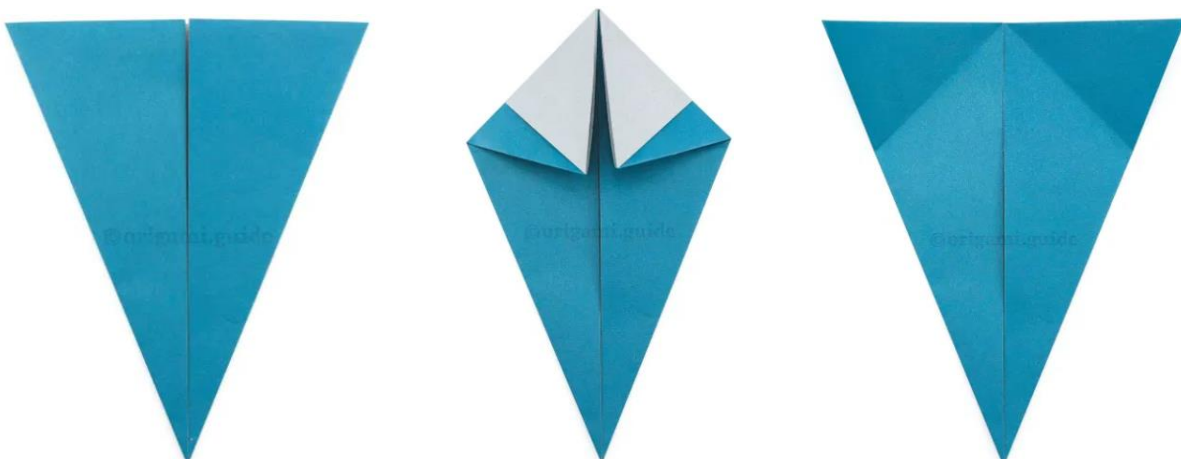

1. Fold the left point of the paper over to the right point then unfold again.

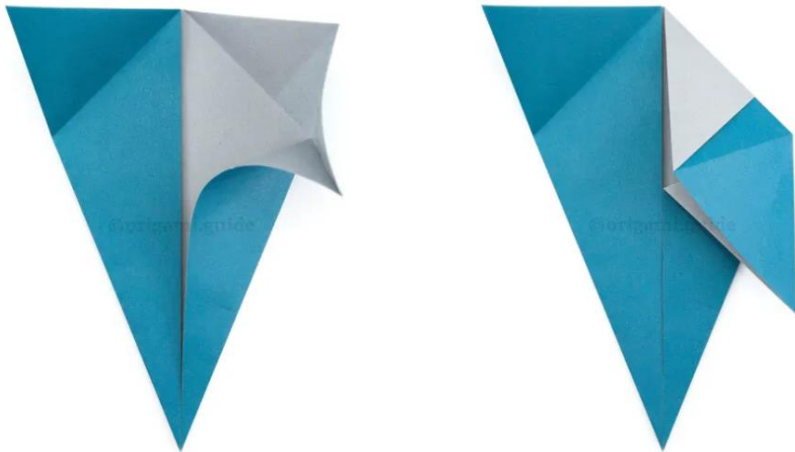

2. Fold the lower left and right diagonal edges to the middle, flip the paper over to the other side and fold the top point down.

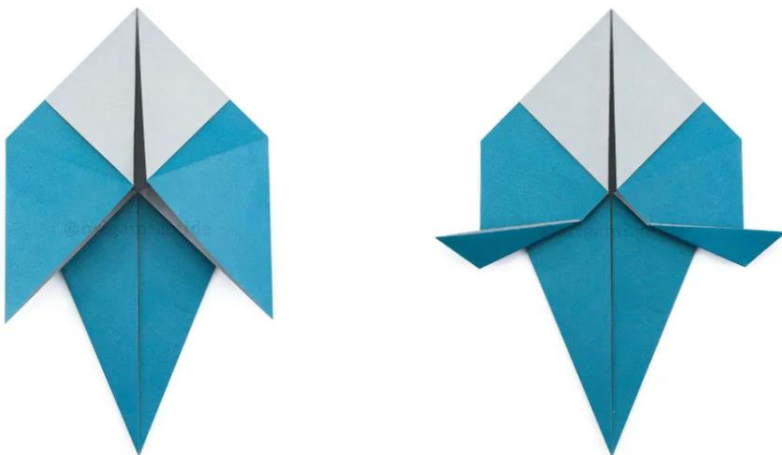

3. Flip the paper back over to the other side and fold the top left and right points diagonally inwards, then unfold the points again.

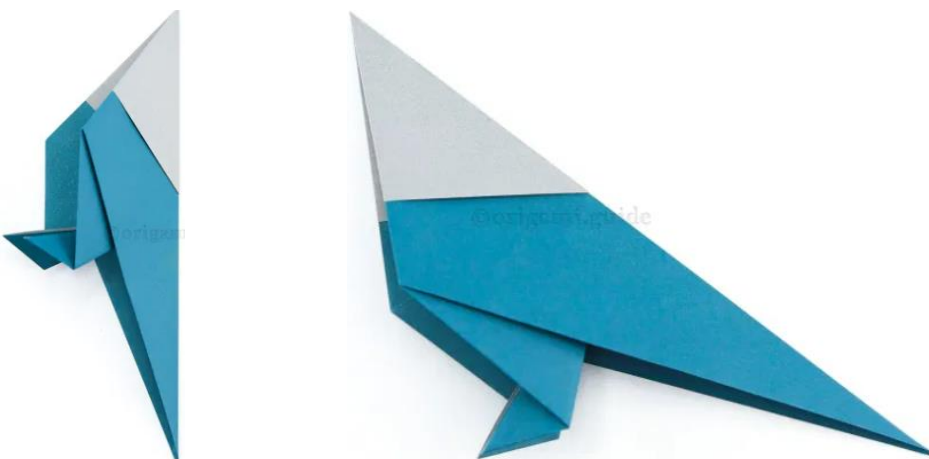

4. Open out the right side and reverse fold the front crease, then flatten the point down completely.

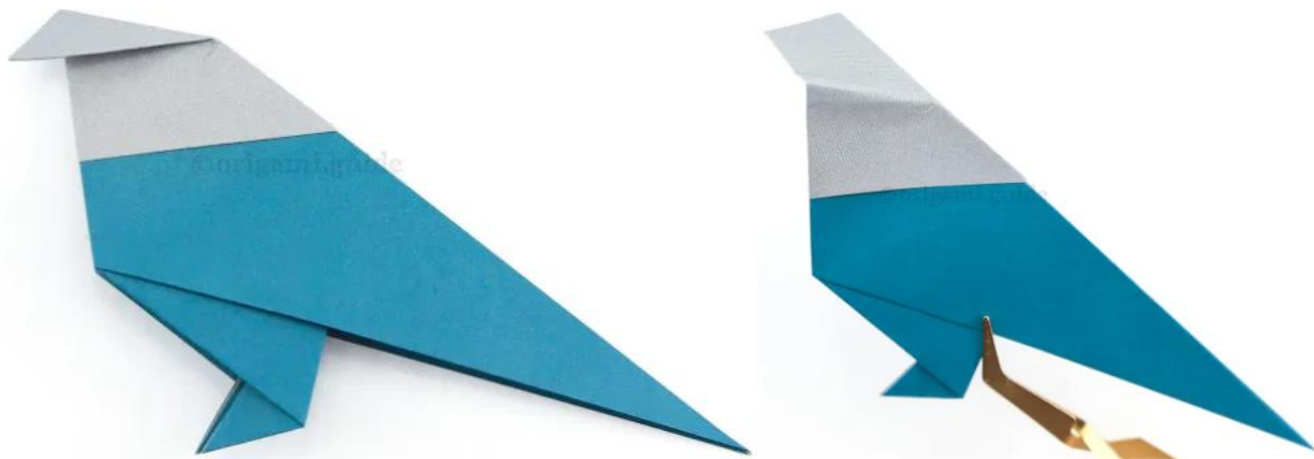

5. Repeat the same process on the left side then fold the two flaps as shown. These will become the bird's feet.

6. Fold the right side over to the left. Rotate the model, you can now start to see a bird take shape.

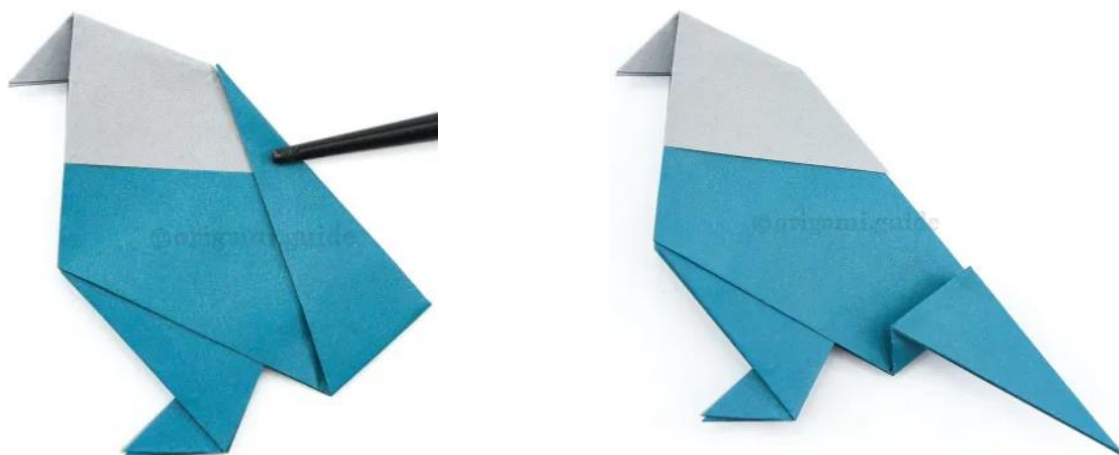

7. Fold the top point over to make a head shape then unfold and open out the top end.

8. Inside reverse fold the beak.

9. For the tail, fold the tip up, aligning with the back edge, then fold the tail back down leaving a gap.

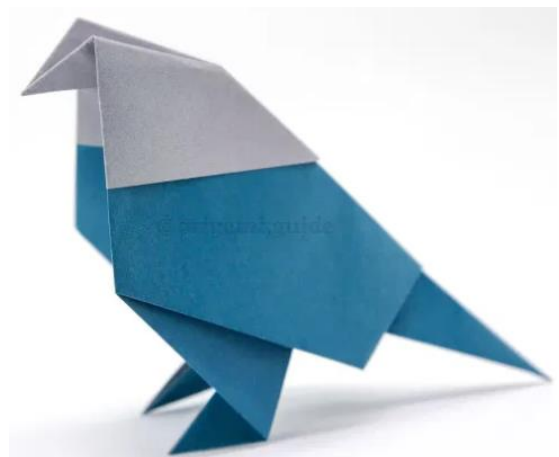

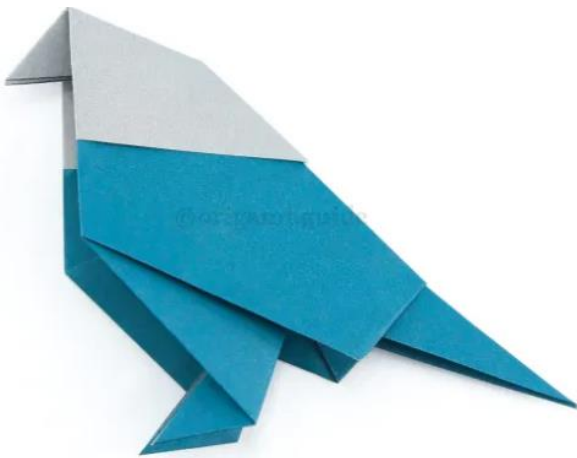

10. Unfold the previous step and open the bird up so you can see inside.

11. Next re-fold the pleat folds inside the bird.

12. Re-fold the bird back together. If your bird has trouble standing, adjust the tail of the bird by pulling and re-folding into place.

**Your origami bird is complete!**
